INDIA'S FIRST HOSPITAL-EMBEDDED CLINICAL AI VALIDATION HUB

We Test and Validate AI in Hospitals.

Bring your AI. We embed it in live hospital workflows, gather clinician-validated evidence, and certify it — with patient safety at every step.

- IEC-Approved Trials
- DPDP Act 2023 Compliant
- CDSCO Framework

WHO WE ARE

Accelerating Safe Clinical AI From Idea to Responsible Impact

PlexusAI is India's first hospital-embedded clinical AI validation hub — built to bridge the gap between promising AI tools and safe, proven clinical adoption. We partner with hospitals, AI startups, pharma companies, and clinicians to rigorously validate, ethically certify, and responsibly scale healthcare AI inside live workflows — with patient safety at every step.

> *"Most healthcare AI never reaches patients — not because the technology fails, but because it is never rigorously tested in real clinical environments. We exist to change that, responsibly."*

HOW IT WORKS

The Validation Journey

From first conversation to a published, certified outcome — every project follows a structured, ethics-governed four-stage process.

01	02	03	04
Onboard	**Deploy**	**Validate**	**Certify**
Intake, scope & IEC-aligned partner alignment	Real OPD / IPD / ICU integration under oversight	Clinician feedback & peer-reviewed RWE capture	CDSCO-ready regulatory dossier & publication

WHAT WE WORK ON

Three Pillars of Hospital AI

We operate across three areas of hospital AI — from daily clinical workflows to regulatory approval and published real-world evidence.

01

CLINICAL INTELLIGENCE

AI Clinical Workflow

We deploy AI to support discharge summaries, outpatient notes, ICU alerts, and clinical decision-making — reducing cognitive load on clinicians and improving patient outcomes. AI assists; clinicians decide.

02

RESEARCH & TRIALS

Digital Health Trials

We run ethics-approved, structured trials for wearables, AI diagnostics, and remote monitoring — under Institutional Ethics Committee (IEC) oversight. You receive publishable, peer-reviewable real-world evidence.

03

REGULATORY VALIDATION

Evidence Generation (RWE)

Auditable, peer-reviewable real-world evidence for CDSCO regulatory submissions, investor due diligence, and multi-centre hospital adoption — fully compliant with DPDP Act 2023.

PROGRAMS OPEN FOR APPLICATION

What Can You Apply For?

01

FOR STARTUPS

Apply for Access →

Clinical Validation Access

Test your AI inside a real hospital — not a lab.

Ethics-overseen access to live workflows, de-identified clinical data, and direct clinician feedback. Validated in months, not years.

02

FLAGSHIP PROGRAM | MOST IMPACTFUL

Apply for Certification →

PlexusAI Validation Certificate

The credential that opens regulated markets for your AI.

India's first structured clinical AI validation certificate — trusted by investors, regulators, and hospitals to open regulated markets faster.

03

FOR PHARMA & MEDTECH

Explore Research →

Sponsored Hospital Research

Commission ethics-approved studies with measurable patient impact.

IEC-approved, ICMR-guided clinical AI studies inside partner hospitals — producing publishable real-world evidence under full regulatory compliance.

04

HIGH-POTENTIAL STARTUPS

Apply to Accelerator →

AI Accelerator Track

Skip the noise. Scale inside a hospital.

Equity-based acceleration — co-building with clinicians and our expert advisory network to bring validated AI to scale responsibly.

05

FOR CLINICIANS

Register →

AI Certification for Doctors

Become the AI-fluent clinician your hospital needs.

AI certification designed by clinicians, for clinicians — to evaluate, implement, and champion AI tools with confidence and ethical clarity.

WHY PLEXUSAI

What You Get With PlexusAI

We take your AI from concept to certified — inside real hospitals, with patient safety and regulatory compliance built into every step.

01

Validate in Real Hospitals

We integrate your AI into live OPDs, IPDs, and ICUs — with real clinical data, under institutional ethics oversight. Validated in months, not years.

02

Clinical Certification

The credential that opens regulated doors. Investors gain confidence. Regulators engage sooner. Hospitals adopt certified AI with institutional trust.

03

Ethically Sourced Data

Appropriately de-identified patient data, governed under DPDP Act 2023 and IEC approval, across live hospital workflows — enabling rigorous, compliant AI validation.

04

Fast-Track to Market

Direct access to clinicians, hospital administrators, and our advisory network — compressing the path from validated AI to responsibly adopted AI.

OUR RESPONSIBLE AI COMMITMENT

All AI tools validated through PlexusAI undergo Institutional Ethics Committee (IEC) review. Patient data is handled in compliance with India's Digital Personal Data Protection (DPDP) Act 2023. PlexusAI outputs are designed to **assist — never replace** — qualified healthcare professionals. All research is conducted under ICMR guidelines and applicable CDSCO regulatory frameworks.

READY TO BEGIN?

Apply to the Innovation Sandbox

We are accepting partners committed to safe, evidence-based clinical AI for Q2 2026. Every engagement is ethics-governed, clinician-led, and built for real-world impact.

Ready to Validate Your AI Responsibly?

Apply to the Innovation Sandbox — accepting partners for Q2 2026.
